Join us at the Veneta Transportation System Plan update Open House #2 - Proposed Improvements

What is the Transportation System Plan?
The Transportation System Plan (TSP) is a long-range document that guides the expansion and operation of our transportation network for all modes of travel over the next 20 years. The City’s current TSP was adopted in 1998 and is currently being updated to reflect the latest community vision, infrastructure systems, and growth projections. This process creates an opportunity to work with residents and businesses to shape the future of the ways people get around in Veneta – including bicycles, sidewalks and trails, transit, cars, and freight trucks.

Get involved and tell us what you think!
The project team has worked with the TSP Citizen Advisory Committee and Technical Advisory Committee to develop recommended transportation system improvements. These include new roadways to support future development, pedestrian crossing improvements, roadway upgrades to provide pedestrian and bicycle facilities, strategies to help support and expand transit service, and much more. Funding for construction of future projects will be limited, so understanding community priorities will be important.

Come to the open house to discuss the proposed recommendations with the project team and tell us which projects should be the highest priorities. The project team will consider public input when developing the draft TSP update later this summer.

For more information or to request special accommodations, contact:
Kay Bork
Community Development Director- 541-935-2191, kbork@ci.veneta.or.us

Please join us at the Open House
August 9, 2018
6:00 PM – 8:00 PM
Veneta City Hall
88184 8th Street
Veneta, OR 97487

If you can’t make it in person, you can view all open house materials online from August 9 through August 24 at venetatsp.org, and provide comments through the website.

Accommodations will be provided to persons with disabilities. To request an accommodation, contact us in advance of the meeting (see contact info below).

Los documentos del proyecto pueden ser traducidos al español bajo petición.
